

REMARKS

This amendment is again intended to attempt to correct the issue in this application regarding the numbering of residues in the amino acid sequence of this protein. The last attempted correction of this by the applicant was still flawed and so the applicant is attempting to amend it again.

This amendment is made contemporaneously with the filing of a RCE. A separate extension of time is submitted herewith so that this can be considered by the Patent and Trademark Office.

Respectfully submitted,

Nicholas J. Seay
